

# Tutorial of Git

Luo, Kai

February 16, 2017

# 1 Introduction

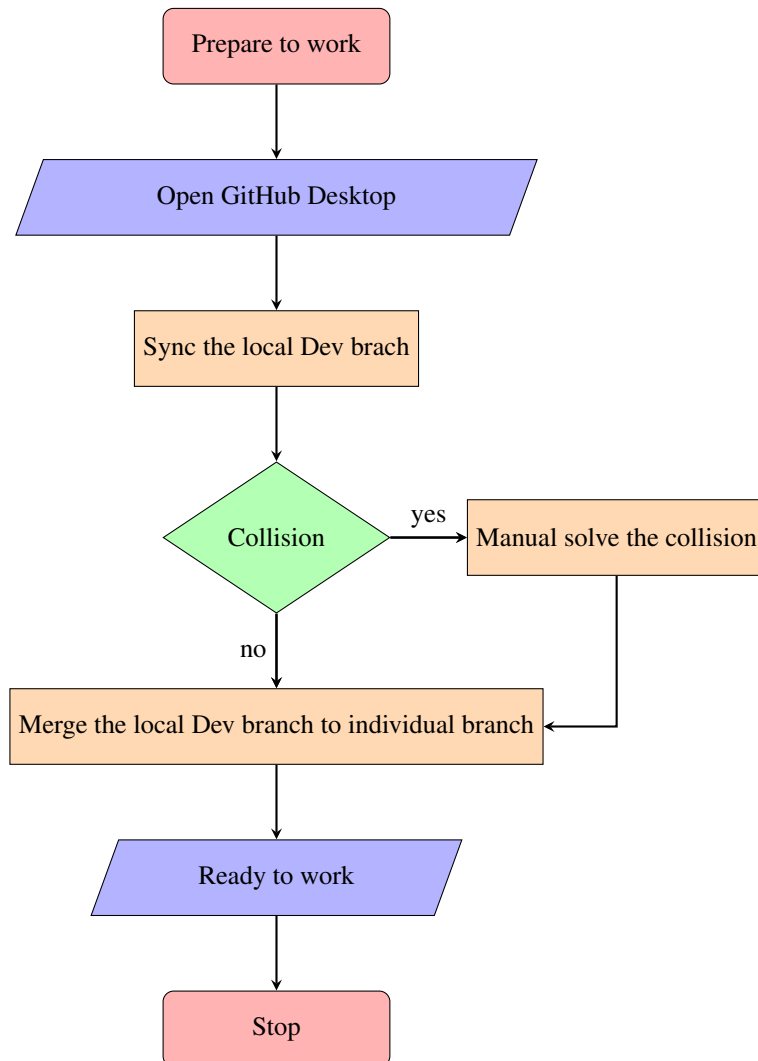

A tutorial of using git in the group project. Let team members could familiar with the git and find a way to solve the problem when facing some problem with git.

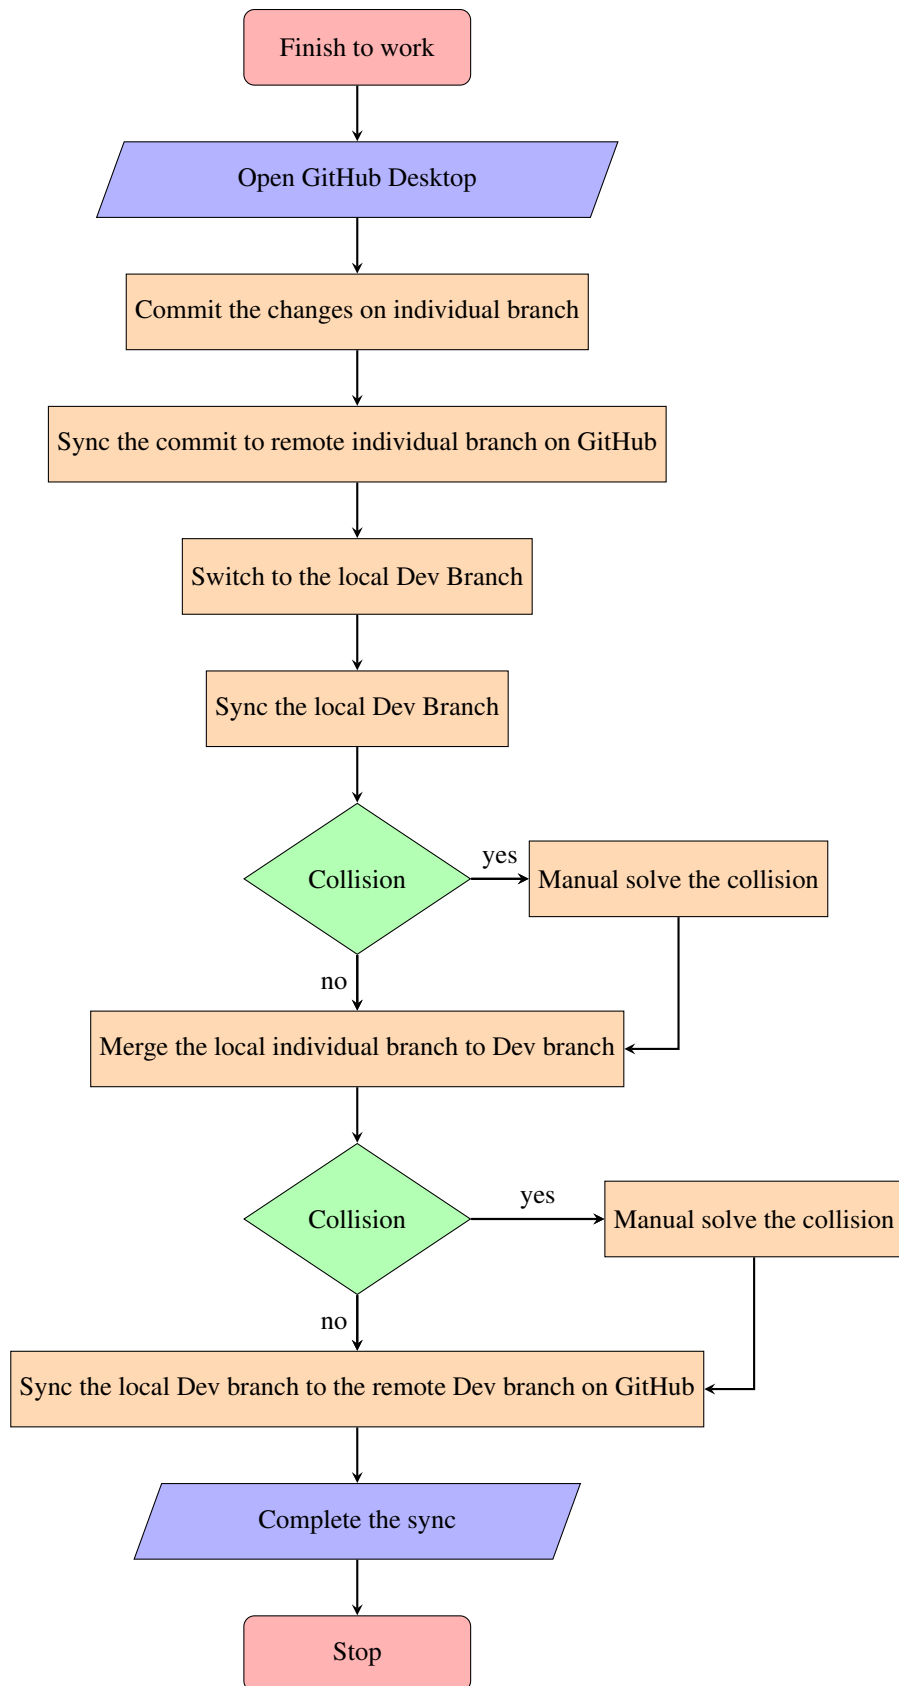

## 2 Pre-requirement

Make sure that the laptop or PC already install the git application, like GitHub Desktop(GUI), Git for Windows(terminal) and so on. The git provided GUI application and terminal application. For fresher, I recommend using GitHub Desktop which is an application provide by GitHub. In our group project, the code of project is uploaded on GitHub. Under the project repository, every team member has their own individual branch.

## 3 Working Flow

### 3.1 GitHub Desktop(GUI)

### 3.2 Git for Windows(Terminal)
